What We Do

Advance Track System is a Pakistani GPS tracking company serving individuals, businesses and enterprise fleets nationwide. We design, install and monitor tracking solutions backed by our own 24/7 control room, certified installation teams in every major city, and a modern web & mobile platform your team will actually enjoy using.

Core Services

Live GPS Tracking

Second-by-second location, speed and ignition status on web and mobile, with full trip history and playback.

24/7 Control Room

Trained operators monitor theft, SOS and tamper events around the clock and coordinate response with you and the authorities.

Anti-Theft Protection

Remote engine immobilization (where safe), tow and tamper alerts, and instant SOS support when it matters most.

Geofencing & Alerts

Draw zones around depots, cities or routes and get instant entry/exit, overspeed and ignition alerts.

Fleet Reports

Daily distance, stops, idling, speed and utilization reports that turn raw tracking data into fuel and maintenance savings.

Customer Mobile App

Track your vehicles, receive push alerts and send secure remote commands from our English/Urdu mobile app.

Who We Serve

- **Families & individuals** — protect your car or bike against theft with 24/7 monitoring.
- **Logistics & distribution** — route discipline, delivery visibility and fuel control across the fleet.
- **School & employee transport** — safer pick-and-drop with live visibility for coordinators.
- **Rent-a-car & leasing** — asset recovery, usage monitoring and geofenced territories.
- **Corporates & banks** — multi-user access, branch-level fleets and audit-friendly reporting.

Why Advance Track System

- Nationwide installation network with certified, vetted technicians.
- Our own control room in Pakistan — not an outsourced call center.
- Modern bilingual (English/Urdu) web portal and mobile app.
- Transparent packages with installation, SIM and monitoring included.
- Enterprise-grade platform — the same system runs our own ERP and control room.
